# A FOCUS ON SUSTAINABILITY

For our Packaging Catalogue, we're focusing on sustainability. We want as much of the packaging we offer our clients to have as minimal an impact on the environment as possible.

## WHY SHOULD WE USE SUSTAINABLE PACKAGING?

**Reduces Waste:** Conventional packaging generates a lot of waste, much of which ends up in landfills or the ocean. Sustainable packaging is designed to be reused, recycled, or biodegraded, reducing the amount of waste generated.

**Conserves Resources:** Many conventional packaging materials are made from finite resources, such as petroleum. By using sustainable packaging materials, we can conserve these resources and reduce our reliance on non-renewable sources.

**Supports Circular Economy:** Sustainable packaging supports the principles of a circular economy, which aims to keep resources in use for as long as possible. By reducing waste and conserving resources, we can create a more circular economy.

**Protects the Environment:** Conventional packaging often contains harmful chemicals that can leach into the environment and cause harm to wildlife and human health. Sustainable packaging is made from environmentally-friendly materials that are safe for both the environment and human health.

In this catalogue you'll find various sustainable packaging options such as the following:

**Recyclable Packaging:** made from materials that can be recycled, such as paper, cardboard, and certain types of plastics.

**Compostable Packaging:** made from biodegradable materials, such as corn starch or sugarcane, that can be composted.

**Reusable Packaging:** designed to be reused, such as refillable containers or reusable bags.

**Biodegradable Packaging:** made from materials that can biodegrade in the environment, such as bamboo or hemp.

Using sustainable packaging is crucial in reducing waste, conserving resources, protecting the environment, and supporting local economies. **Make a conscious effort to choose sustainable packaging solutions from Kerston Foods.**
